Apr. 13, 1999, now Pat. No. 6,254,860.

A method of treating a disorder in an eye, for example, an aqueous deficient dry eye state, phacoanaphylactic endophthalmitis, or uveitis, is provided. The method generally includes administering a therapeutically effective amount of a certain cyclosporin A derivative topically to the affected eye. The derivative may be administered as a solution, suspension or ointment in a pharmaceutically acceptable excipient.
